Zurich Services Corporation New federal guidelines you need to know: Comprehensive Safety Analysis (CSA) 2010 program

**Is your fleet regulated by the Department of Transportation?
The answer might surprise you.**

We find that many of our customers assume that only 18-wheel trucks are regulated by the Department of Transportation. Actually, many medium-sized vehicles such as delivery vans, stakebed trucks and even pickups pulling large trailers are considered commercial motor vehicles.

We want to be sure that our customers operating commercial vehicles of any kind fully understand the new CSA 2010 program the Federal Motor Carrier Safety Administration is implementing. This program will result in significant additional auditing and intervention by the Agency.

CSA 2010 is a major initiative to improve the effectiveness of the Agency's compliance and enforcement program. Its goal is to help reduce large truck and bus crashes, injuries and fatalities.

View our presentation to learn more about how CSA 2010 could affect your business.

Zurich has developed a helpful online educational program that introduces the CSA 2010 concepts and addresses what you and your drivers may need to do to prepare for these changes.
